ES140 EE Module Lab Policies

LAB SAFETY

Operation of equipment shall be performed under the supervision of the teaching assistant (TA) during regular lab hours. You may also operate equipment outside the regular lab hours if needed. Make sure to inform the TA and leave everything as you found it. Switch the light off before you leave.

LAB MAINTENANCE

Leave everything as you found it. Rooms are used by other classes, so it is important for you to keep the room clean when you leave.

WORKING TOGETHER

Lab partners are encouraged to work together while performing the lab experiments. If any of you have to be absent from the lab, inform your partners AND the TA.

LAB DAILY LOG

Each team must complete the Laboratory Daily Log to record the work done and any problems encountered. Select a different recorder for each lab.
